

For more than 25 years, ATP-CGPharm has been supporting clients in the Life Science Industry with a broad range of services in facility and process-engineering, commissioning, qualification & validation, consulting in quality assurance and quality control, environmental monitoring and data analytics.

We contribute every day to ensuring pharmaceutical product quality, patient safety, and strict compliance with regulatory requirements by supporting the continuous improvement of the manufacturing processes and quality programs of our clients. Today we are proud to be renowned throughout the Life Science Industry as one of the preferred business partners and employers of choice.

To support our growth, we are looking for talented young professionals and experienced experts. At present we have an open position as:

HVAC Engineer for Cleanrooms (80-100%)

Your Role

- Planning of heating, air conditioning, refrigeration, ventilation and sanitary systems (HVAC) for our engineering projects
- Preparation of technical drawings and calculations
- Coordination and harmonization with other systems and project participants
- Construction Supervision
- Carrying out cost and schedule planning
- Preparation of tender documents and participation in the awarding of contracts

About You

- Completed studies (BS, MS, Dipl. Ing., technical college) or a comparable qualification in the field of supply engineering, building technology, HVAC or mechanical engineering
- Several years of professional experience in the planning of HVAC systems in the pharmaceutical or biotech industry
- Sound knowledge of the relevant standards and regulations
- Confident handling of CAD software (e.g. AutoCAD, Revit) and standard IT tools such as MS Office, ideally familiar with MS Project
- Ability to work in a team, strong communication skills and ability to work independently
- Excellent written and spoken German and English skills

Our Offer

ATP-CGPharm offers long-term career opportunities. In addition to an inspiring and motivating work environment we offer attractive remuneration packages and excellent social security coverage.

At ATP-CGPharm we truly value your efforts, and we actively support you in your professional development and in reaching your goals.

Next Step

Now it is up to you. Take the next step and send us your application.

It could be the first step in joining a company where your talent and passion are truly valued.
